Subject: Applying for the position of Junior Software Developer.

Dear Hiring Manager,

I was pleased to see your company's job posting on indeed. Please consider the attached resume as an application for the job of a Junior Software Developer. I believe that my knowledge and skills can be a great asset for your company My skills in software development and user interfaces would make me a great fit for this position. Also, my other technical skills can be useful to your company.

I have a 3-year advanced diploma in computer programming and analysis from the George brown, college. During this, I discovered the skills of web development from the floor. Further, I turned into given advanced know-how of Web and Desktop App Development. During my studies, I had Capstone Project, which helped me in learning about the cross-platform compatibility and as well as working with mongoDB and RESTful APIs. While working on my capstone my capstone, I, in addition, polished my teamwork and communication skills.

I believe that your company would be an ideal position for me to enhance my skills. And thus, I have enclosed my resume.

I look forward to meeting and encourage you to mail to schedule an interview. You can reach me out at patelnishtha0009@gmail.com or at (647)-770-9012.

Thank you!

Have a great day!

Yours Sincerely,
Nishtha Patel
